EXAMINER

LOFDAHL, JORDAN M

ART UNIT	PAPER NUMBER
----------	--------------

3644

DATE MAILED: 02/03/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/892,355	Applicant(s) CHRISTIANSEN ET AL.	
	Examiner Jordan M Lofdahl	Art Unit 3644	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 June 2001.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-22 and 27-38 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 27-34 is/are allowed.
- 6) ☒ Claim(s) 1-22 and 35-38 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

Response to Arguments

Applicant's arguments filed 12/27/02 have been fully considered but they are not persuasive.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 2, 7-11, 13, 14, 16-22, 35, 36 and 38 are rejected under 35 U.S.C. 102(e) as being anticipated by Dvorak (6298765).

As to claim 1, Dvorak discloses a device comprising a plurality of shield layers (36) which are capable of being flexible; a support layer (38) capable of being resilient; a protective cover (20); and fasteners (40).

As to claim 2, disclosed is the support layer being open cell foam.

As to claim 7-9, disclosed are the fasteners comprised of Velcro or snap or straps (col. 5, lines 3-7).

As to claims 10 and 11, disclosed is the flexible shield comprised of ceramic fabric or high-strength fabric (col. 3, lines 44-49).

As to claim 13, disclosed is the cover made of an abrasion resistant material and provide thermal protection (col. 4, lines 14-31).

As to claim 14, disclosed is a vented cover (22).

As to claim 16, the cover is optically reflective.

As to claim 17, disclosed is a device comprising a means for shocking particles (36); means for supporting the shocking means in a resilient manner (38); means for enclosing the shocking means in a cover layer (20) and a means for securing the shocking means to a structure (40).

As to claim 18, disclosed is a means for reducing a size and volume occupied by the protection system. The device is capable of compressing (col. 3, lines 61-64).

As to claim 19, disclosed is a means for deploying the shocking means on a structure.

As to claim 20, disclosed is a means to thermally insulate the shocking means.

As to claim 21, disclosed is a means for venting gas particles (22).

Art Unit: 3644

As to claim 22, disclosed is a means for containing debris (col. 4, lines 37-48).

As to claim 35, the cover is optically absorptive.

As to claim 36, disclosed is a device comprising a plurality of shield layers (36) which are capable of being flexible; a support layer (38) capable of being resilient; a protective cover (20); fasteners (40) and a plurality of holes (22) capable of venting gases.

As to claim 38, Dvorak discloses a device comprising a plurality of shield layers (36) having a thickness that is determined based on the size of a particle to be shocked (it is inherent in the art of shielding that the thickness of the shielding material is based on the projectile it is designed shield) which are capable of being flexible; a support layer (38) capable of being resilient; a protective cover (20); and fasteners (40).

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 3-6, 12, 15 and ³⁷~~36~~ are rejected under 35 U.S.C. 103(a) as being unpatentable over Dvorak (6298765).

Art Unit: 3644

As to claims 3 and 4, not disclosed is the support layer being closed-cell foam with a low pressure gas. It would have been obvious to one having ordinary skill in the art at the time the invention was made to comprise the support layer of closed-cell foam with a low pressure gas, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

As to claim 5, not disclosed is the support layer being a ceramic foam. It would have been obvious to one having ordinary skill in the art at the time the invention was made to comprise the support layer of a ceramic foam, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

As to claim 6, not disclosed is the support layer having one or more portions removed therefrom. It would have been obvious to one having ordinary skill in the art at the time the invention was made to remove portions of the support layer, since it has been held that omission of an element and its function in combination where the remaining elements perform the same function as before involves only routine skill in the art.

As to claim 12, not disclosed is the particle shield comprising at least one thermal insulation layer. Since the material is "space-rated". It is inherent that the shield is thermally insulated.

Art Unit: 3644

As to claim 15, not disclosed is the cover being flame retardant. It would have been obvious to one having ordinary skill in the art at the time the invention was made to comprise the cover of flame retardant material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

As to claim ³⁷~~36~~, Dvorak discloses a device comprising a plurality of shield layers (36) which are capable of being flexible; a support layer (38) capable of being resilient; a protective cover (20); and fasteners (40). Not disclosed is a back wall layer between the flexible shield layers and the protective cover. It would have been obvious to one having ordinary skill in the art at the time the invention was made to locate a support layer (38, capable of being a back wall) between the plurality of flexible shields layers and the protective cover, since it has been held that rearranging parts of an invention involves only routine skill in the art.

Allowable Subject Matter

Claims 27-34 are allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3644

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jordan M Lofdahl whose telephone number is 703.605.1217. The examiner can normally be reached on 7-5 M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles T Jordan can be reached on 703.306.4159. The fax phone numbers for the organization where this application or proceeding is assigned are 703.305.7687 for regular communications and 703.305.7687 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703.306.4180.
